

Script for the Final Event (SFE)

☰ Phase	Build-Measure-Learn
📅 Due Date	@May 27, 2022

- Regarding the catalog of items, we intend to choose some interesting products to offer to the guests, considering the initial budget of 40 euros and having in mind a considerable amount of cheaper products (pens, candies, etc.) and a few expensive products.
These last products will be offered to the winners of a raffle that will be held at the end of the event.
- Our presentation will start with an interactive moment, in which we will use cups and coins to demonstrate the value of our product, in order to capture the audience's attention.
- This is followed by the presentation of our product, in which we explain its context and the features developed.
- Next, we'll show a video demo of our product, which includes its main use cases.
- We end with a brief summary of our work and an exposition of our ideas about WindPlan's early days, and projections for the future.
- During the rest of the day, we will be at our stand to welcome guests and interact with them in order to clarify any existing doubts and generate interest in our company.
